

# Donnie Wu

U.S. Citizen

[Donniewei.wu@gmail.com](mailto:Donniewei.wu@gmail.com) | <https://github.com/DonnyWu> | <https://donnywu.github.io/web-portfolio/>

## Skills

---

**Programming Languages:** Python, C#, Java, JavaScript, R, SQL, HTML, XML, CSS

**Frameworks/ Applications/ Tools:** Claude Code, Docker, AWS, .NET, Git, Github, Github Co-Pilot, Visual Studio, Visual Studio Code, Node.js, Tailwind CSS, Bootstrap, Spring Boot, Azure Devops, SQL Server Management Studio, PostgreSQL

## Work Experiences

---

**Software Development Engineer | Mitsubishi Electric (Serendie Unit) | Cambridge, MA | Aug. 2023 - Present**

- Engineer data-driven software solutions for Mitsubishi Electric US business units, utilizing the Serendie platform to unify operations across diverse infrastructure domains
- Incorporate React and Vite Interfaces, optimizing rendering cycles for seamless real-time data synchronization and complex user interactions
- Design scalable data pipelines using FastAPI, Salesforce, and Snowflake to ingest and synchronize high-integrity data for downstream AI models
- Deploy containerized AI applications and data infrastructure utilizing Docker across secure AWS cloud environments
- Optimize team productivity by integrating Claude LLM and GitHub Copilot into the SDLC, doubling our debugging and code review effort in each sprint
- Configure context-aware agentic workflows by mapping complex system architectures and constraints into structured Markdown for LLM prompt context

**Software Engineer | InterPro Solutions | Stoneham, MA | Jan. 2022 - Nov. 2022**

- Developed flagship mobile applications (EZMaxMobile) using Java, Spring Boot, and TypeScript, designing and integrating complex IBM Maximo Business Object APIs to meet custom client requirements
- Customized UI/UX layouts for the EZMaxRequest platform using React.js, improving user navigation and interface responsiveness
- Validated cross-platform compatibility between mobile interfaces and backend IBM Maximo databases through rigorous environment testing
- Resolved high-priority technical tickets in collaboration with architects and support teams to maintain Client-Specific builds

**Undergraduate Teaching Assistant | University of Massachusetts, Amherst | Amherst, MA | Sept. 2018 - Jun. 2020**

- Worked as an Undergraduate Teaching Assistant for the course: *CS 105 – Computer literacy*
- Held office hours; helped student understand class material including basic web development, interacting with a MySQL database, and programming in Python
- Debugged and graded students' assignments and input into them in grade database
- Proctored exams with the professor

**Software Engineer Intern | Allscripts | Burlington, MA | May. 2019 - Aug. 2019**

- Automated regression testing for the *Access Manager* business layer using C#, ASP.NET, and Microsoft Azure web services
- Developed audit test cases to verify authorization security protocols within the Access Manager database
- Setup quality assurance testing environment in order to run test case manually within Access Manager
- Identified and documented critical bugs using Team Foundation Server (TFS), collaborating with Developers and the Principal Architect to implement fixes

## Education

---

**University of Massachusetts, Amherst**, College of Information and Computer Science, *3.63 GPA*, **Sept. 2016 - May. 2020**

**Bachelor of Science** in Data Science Informatics; Concentrations in Full Stack Development & Business Intelligence

**Minor** in Information Technology
